SKILLS

- **Languages:** C++, JavaScript, C, PHP, Java
- **Frameworks:** HTML and CSS, Bootstrap, NodeJS, React, Flask/Fast API
- **Tools/Platforms:** MySQL, MongoDB, Git
- **Soft Skills:** Problem-Solving Skills, Team Player, Project Management, Adaptability

PROJECTS

- **Video chat App:**
 - Developed a real-time YouTube watch-party and chat platform using WebRTC and Node.js, enabling synchronous video playback and live messaging across users.
 - Implemented peer-to-peer communication, signaling, and room-management architecture to support multiple simultaneous sessions with low latency.
 - Utilised JavaScript on the front-end and Node.js with Express on the backend, integrated REST endpoints & socket connections for robust real-time interactivity.
 - Gained strong skills in WebRTC APIs, real-time networking protocols, event-driven backend development, and collaborative UX design.
- **Multithreading Simulator:**
 - Created a visual simulator that demonstrates thread scheduling, synchronization mechanisms, and concurrency primitives (locks, monitors) in Java.
 - Built an interactive canvas UI that lets users visualize thread states, resource contention, and scheduling results in real time.
 - Coded in Java, leveraged Swing/JavaFX (or equivalent canvas library) for GUI, and implemented OS-level concepts like waiting, notifying, and thread pooling.
 - Strengthened understanding of multithreading, synchronization issues (deadlock, race conditions), and pedagogical tool development to teach OS concepts.
- **Message Encoder and Decoder:**
 - Developed a web application that encodes and decodes text messages using a custom symbol-based system supporting letters, numbers, spaces and case-sensitivity.
 - Built with HTML, CSS and JavaScript for front-end logic; designed algorithms for custom encoding, decoding logic and UI to display results clearly.
 - Implemented error handling for unsupported characters, real-time display of transformation, and intuitive user interface for easy interaction.
 - Enhanced skills in algorithm design, front-end development, and client-side JavaScript problem solving.

CERTIFICATES

- **Introduction to Front-End Development | Meta** **Sep-2025**
Built practical skills in creating responsive, high-performance web interfaces using HTML, CSS, JavaScript, and React, with emphasis on modern frontend standards and seamless user experience.

- **Foundations of Cybersecurity (Google | Coursera)** Sep-2025
Acquired foundational expertise in cybersecurity principles, risk management, and security frameworks for protecting digital systems against threats.
- **SQL and Relational Databases 101 (IBM | CognitiveClass.ai)** Jul-2025
Gained practical expertise in designing, querying, and managing relational databases with SQL for efficient data handling and analysis.
- **Computational Theory: Language Principle & Finite Automata Theory (Onwingspan)** Jul-2025
Built solid foundations in theoretical computer science through study of automata, formal grammars, and core computational theory principles.
- **Introduction to Hardware and Operating Systems (IBM | Coursera)** Sep-2024
Gained core understanding of computer hardware and operating systems, covering architecture, functionality, and integration to build a solid IT infrastructure foundation.

- **The Bits and Bytes of Computer Networking (Google | Coursera)** Sep-2024
Developed practical networking skills, including protocols, IP addressing, troubleshooting, and core services essential for modern network operations.

EDUCATION

Lovely Professional University		
•	<i>Bachelor of Technology - Computer Science and Engineering; CGPA: 7.0</i>	<i>Since August 2023</i>
Indirapuram Public School		
•	<i>Intermediate; Percentage: 73%</i>	<i>April 2021 - March 2023</i>
Indirapuram Public School		
•	<i>Matriculation; Percentage: 82%</i>	<i>April 2019 - March 2021</i>
